About SIGCHI and ACM

CHI 2010 is sponsored by ACM's Special Interest Group on Computer-Human Interaction (ACM SIGCHI). The scope of SIGCHI consists of the study of the human-computer interaction processes and includes research, design, development, and evaluation efforts for interactive computer systems. The focus of SIGCHI is on how people communicate and interact with a broadly-defined range of computer systems. SIGCHI serves as a forum for the exchange of ideas among computer scientists, human factors scientists, psychologists, social scientists, designers, educators, and practitioners involved in the design, implementation, and evaluation of interactive computing systems. Nearly 5,000 professional members of the SIGCHI community work together toward common goals and objectives. Visit SIGCHI at http://www.sigchi.org.

ACM, the Association for Computing Machinery http://www.acm.org/, is an educational and scientific society uniting the world's computing educators, researchers and professionals to inspire dialogue, share resources and address the field's challenges. ACM strengthens the profession's collective voice through strong leadership, promotion of the highest standards, and recognition of technical excellence. ACM supports the professional growth of its members by providing opportunities for life-long learning, career development, and professional networking. ACM offers its 87,000 global members cutting-edge technical information through world class journals and magazines, dynamic special interest groups and globally recognized conferences.

Upcoming Events

EICS 2010
