Longitude:

Location Name:

Email address:

Submit

Key lesson 1

Expert searchers know the capabilities of their tools. They know what's possible.

* *Finding and using other resources*

Someone told me that in the mid-1800's, people often would carry around a special kind of notebook. They would use the notebook to write down quotations that they heard, or copy passages from books they'd read. The notebook was an important part of their education, and it had a particular name.

Question: What was this kind of notebook called?

Answer

- This is a really hard question. The best way to answer it is to first look for a reverse dictionary.

[reverse dictionary]

- Then, go to the reverse dictionary

<http://www.onelook.com/reverse-dictionary.shtml>

... and type in the words
[notebook quotations]
 then look thru the list of words it shows you.

- **Answer:** “commonplace book”

Key lesson 2

**Expert searchers use
more than one resource.**

Key lesson 3

Expert searchers deeply understand their language, especially synonyms.

* *Think about synonyms—choosing keywords*

- When an artist is making a sculpture for a client, they often make a small version of the sculpture in wax or clay. They're usually a preliminary sketch, presented to the client for approval

- **Question:**
What is this thing called?

Answer

- [**small artist model**] – then read through the snippets to find a definition.

But... double check, you can use Google as a dictionary:

[**define maquette**]

Dictionary

maquette

noun /ma'ket/ 
maquettes, plural

1. A sculptor's small preliminary model or sketch

Web definitions

A maquette (French word for scale model, sometimes referred to by the Italian names *plastico* or *modello*) is a small scale model or rough draft of an unfinished architectural work or a sculpture. An equivalent term is *bozzetto*, from the Italian word that means "sketch".
en.wikipedia.org/wiki/Maquette

a preliminary model or sketch used in preparation for making a sculpture
en.wikipedia.org/wiki/Maquette

Keep looking! Think of synonyms!

- Sometimes you need to keep trying, thinking your problem through in different ways. Usually, if **you think about how someone else would describe the thing** you're looking for, that will suggest search terms for you.

Synonyms: Side-effect of framing

- **Question:** A friend told me that there is an forgotten city in the waters of San Francisco Bay. Is that true? If it IS true, what was the name of the supposed city?

Answer

- Yes, it's true... there IS an abandoned city near what is now Fremont. It was called **Drawbridge**.
- The trick here is to think about other ways of describing an “abandoned city”—don't just assume that's the best way to describe it. Try this search:

[ghost town san francisco bay]

The former town of Drawbridge
(Story about [abandoned city])

BIG POINT: Synonyms (the 3 Elses)

- When you're failing at a search:
 - Sit back and figure out how **ELSE** you can say it...
 - How would someone **ELSE** talk about what you seek?
 - It's not about your language, it's about someone **ELSE!**

* *Think about synonyms within language variants*

- You know that when you eat pig, the meat is called “pork.”
When you eat sheep, the meat is called “mutton.”
When you eat deer, the meat is called “venison.”
- Consider shift in language from place-to-place
 - PIN (property identification number) differs by state

Consider regional variations:

- Don't have to tell you about UK vs. US English (bonnet = windshield, etc.)
- But US regional variations can be impressive:
 - branch, brook, beck, burn, creek, crick, gill (occasionally ghyll), kill, lick, rill, river, syke, bayou, rivulet, streamage, wash, run or runnel.

Learning how to read... again

- **Anti-reading:** Looking for terms you don't know

myr·i·ad

/ˈmɪrēəd/

literary

noun

1. a countless or extremely great number.
"networks connecting a **myriad** of computers"
synonyms: a multitude, a large/great number, a large/great quantity, scores, quantities, a mass, a host, droves, a horde; [More](#)
2. (chiefly in classical history) a unit of ten thousand.

adjective

1. countless or extremely great in number.
"the myriad lights of the city"
synonyms: innumerable, countless, infinite, numberless, untold, unnumbered, immeasurable, multitudinous, numerous; [More](#)

* *Try this yourself*

- [define zero day attack]
- [define MRSA]
- [define loxodrome]
- [define Mollweide projection]
- [define predator]
- [define predator drone]

Key lesson 4

**Expert searchers
understand the terms and
key concepts **AND** know
how to read the genre.**

* *Use most obvious language*

- What is this thing called?

Try this query: [**bright spot in sky near sun**]

Moral #1: when in doubt, describe the object-of-interest in the way you think others will...

Moral #2: the first answer may-or-may-not be what you're looking for... Evaluate the result wrt your search goal.

* *Use images*

- I was hiking in the woods nearby in March when I saw a pretty blue flower. It was about 3 feet high, and grew along the pathway in the middle of the woods in Henry Coe State Park.

- **Question:** Here's the picture... can you tell me what the common and Latin name is of this flower?

What are the common AND the Latin names of this flower?

- Search: web for [blue wildflowers henry coe]
 - Look for collections of pictures. Look for a matching / similar picture.
- Trick: add a **context term** to look for collections of pictures
 - [blue wildflowers henry coe album]
 - [blue wildflowers henry coe image collection]
- **Answer:** Ithuriel' s Spear (*Triteleia laxa*)
 - AKA Grass Nut, Wally' s Basket...

* *Going deeper on a topic: Using domain language*

- I kind of like that wildflower! What else can I find out about it of a horticultural or botanical nature?
 - *Where does it grow near my home?*
 - *Does it like to live in the sun or the shade?*
 - *What level of acidity does it prefer in the soil?*
 - *Where can I buy this plant for my home garden?*

Answer

- I started with the Latin name because it's the MOST specific term you can use. So I did a copy & paste from the previous search:

[*Triteleia laxa*]

and then started looking around. I quickly found that I could see it in Coe Park, near Morgan Hill.

- When I looked up the Wikipedia entry, I found that it likes shady conditions. I then checked my work by doing a search for

[*Triteleia laxa shady*]

Sure enough, other places say the same thing. It checks out!

Flying into JFK (from the east to west)

What's causing those rectilinear features ?

How big are those features?

- Use Google Earth (or Maps) to zoom in with a measuring tool

- Realize that these aren't **CANALS**, they're more like **DITCHES!**
- Language (specific terms used) **matters**

Use "Directions" to get actual distance

The screenshot shows the Google Maps interface with a route highlighted in blue. The route starts at MIT and ends at Kendall/MIT. A tooltip at the end of the route indicates a distance of 1.41 miles. The interface includes the Google logo, search bar, navigation controls, and a sidebar with a title 'Suspect travel' and a description: 'Mr. X claimed to have walked from his hotel to the rendezvous point in 10 mins. Could he? This is the route he claimed.' The sidebar also has privacy and sharing settings, with 'Public' selected.

Key lesson 4

**Expert searchers know
the capabilities of their
tools.**

How to remove bogus results from your searches

- Sometimes you want to look up something that's pretty common, so there are LOTS of web pages out there. It's even worse when the word is really common. So how do you eliminate things you don't want?
- **Question:** Can you find a great recipe for salsa to make for dinner tonight? IN PARTICULAR... your nephew is allergic to tomatoes. Can you find a salsa recipe without tomatoes in it?

Example of minus use... removing

- The trick here is to remove all those “salsa as dancing” meanings. The quick way to do that in a web search is with the MINUS sign.

[salsa -dancing] -- this will remove all the dancing references

[salsa -dancing -tomatoes] – and the vegetables

*No space
after the
minus sign!!*

Quotes

- Use double quotes to search for an exact phrase

[when venus the goddess of beauty and love]

Vs.

* *Finding a particular kind of document*

- Your brother is a teacher at the local high school, and needs to find a lesson plan for a unit on superconducting materials.
- **Question:** Can you find a lesson plan for him?
- Hint: Look for a particular KIND of document...

Answer

- Use the operator FILETYPE: to focus in just on presentations

[superconductor high school filetype:ppt]

- **Note** that filetype: can take on ANY file extension –
 - PDF, PPT, XLS, DOC, WMV, TXT, CSV, SKP, KMV, ...

(In fact, arbitrary extensions... e.g., AQS)

* *Searching within a particular site*

- Someone told me that I'd been quoted in the New York Times. OMG! What did I say that was quotable?
- Can you find a page in the New York Times where I (Dan Russell) was quoted?

Answer

- Use the site: operator to search within a particular web site...

[“Daniel M Russell” **site:nytimes.com**]

... and see the number 1 hit. (Yes, I worked at IBM.)

- Answer:**
1. Because “Daniel Russell” is a very common name.
 2. The NYTimes has the convention of always spelling a person’s name out completely, including middle initials

Turf Wars on the Football Field

February 1, 2013 by [Jennifer Harbster](#)

Football match in open field, players wearing uniforms, 1936

You might think this post will be about the battle between the Baltimore Ravens and the San Francisco 49'ers in Superbowl XLVII (2013). This post is not about the players or the teams, but about a part of the game. Plain and simple, I am writing about the turf grass (natural and synthetic) because in football, turf (i.e. grass) is a necessary and significant aspect of the game.

Debate on the advantages and disadvantages of natural vs. synthetic turf grass on football fields and other sports fields have been argued since synthetic turf was first used. In fact, in 1971 there was a Congressional hearing investigating product safety that included artificial turf as one of the products under investigation (see [Consumer Product Safety Act of 1971. Hearings, Ninety-second Congress, first session](#) or CIS 72-H501-22). Over the years, the NFL, the NCAA, the NFLPA, the Consumer Product Safety Commission, Congress, and a multitude of scientists charged with investigating the matter, have

contributed to the ongoing discussion, even as the nature of synthetic grass itself continues to change.

Natural Turf Grasses- There are about 10,000 worldwide, but only a few of these are considered turf grass—and only six species, and their turfs are used

Greatest Inventions: 2012 and 1913 Editions

December 28, 2012 by [Jennifer Harbster](#)

O. Wright aeroplane, in flight. George Granth Bain Collection, 1908.

As we approach the end of another year of the Gregorian calendar, publishers and the media provide a look back at their top news stories or 'best of' from the past year. Scientific publishers also provide retrospectives of the year that tend to focus on top inventions, such as [Popular Science's Invention Awards](#) (also see its 100 Innovations of the Year, December 2012 issue) or top science stories, such as [Discover Magazine's Top 100 Stories of 2012](#) (Jan/Feb 2013) and [Scientific America's Top 10 Science Stories of 2012](#). [Time Magazine](#) also gets into the mix with its [Best Inventions](#) list (The 50 Best Inventions, Nov. 28, 2012).

cache:blogs.loc.gov/inside_adams/

inurl: searches for a term within URL

inurl:

The screenshot shows a Google search interface. The search bar contains the query "site:nih.gov inurl:klinefelter". Below the search bar, there are navigation tabs for "Web", "Images", "Maps", "Shopping", "Books", "More", and "Search tools". The "Web" tab is selected. The search results indicate "About 328 results (0.42 second...)". Three search results are visible, each with a blue title link, a green URL, and a brief description.

site:nih.gov inurl:klinefelter

Strategy: Learning IA and using inurl:

- **Question:** Find a person who lives on an island in or near Australia, and whose Google-plus profile lists his LinkedIn, Twitter, and Pinterest profile URLs.

- Now that you've found him, what color is the piece of furniture on his company's website home page?

- Answer: Red

[**site:plus.google.com**
inurl:about
au.linkedin.com
twitter.com pinterest]

- **Why this query?**

1. Limit query to search JUST G+ profiles. site:
2. Search plus.Google.com for all of the ABOUT pages.
If you look at a few G+ ABOUT pages, you'll see they all have a URL that looks like this:

<https://plus.google.com/u/0/01234567890123456/about>

intext:

If you include [intext:] in your query, Google will restrict the results to documents containing that word in the body of the document.

For instance, [**intext:"dominican nuns"**] will return documents that have the phrase “dominican nuns” somewhere in the text.

Note there can be no space between the “intext:” and the following word.

intext: requires that the text be in the body of page

site:nih.gov inurl:klinefelter intext:bethesda

Combining operators – site: with intext:

[**site:stanford.edu**
"coral bleaching" **intext:geophysics**]

Summary:

Coral reefs around the world are sustaining massive damage at an alarming rate. "Geological Approaches to Coral Reef Ecology" provides a uniquely historical perspective on the destruction – through both natural and human processes – of coral reef ecosystems. Chapters applying the principles of geophysics, paleontology, geochemistry, and physical and chemical oceanography supply novel insights into the workings of coral reefs, complementing real-time ecological studies and providing critical information for crafting realistic environmental policy. By reconstructing the ecological history of coral reefs, the authors are able to evaluate whether or not recent, dramatic changes to reef ecosystems are novel events or part of a long-term trend or cycle. The contributions examine the interacting causes of change, which include hurricane damage, regional outbreaks of coral-consuming predators, disease epidemics,

intitle:

[intitle:] restricts the results to documents containing that word in the title. For instance, [intitle:google search] will return documents that mention the word "google" in their title, or mention the word "search" anywhere in the document (title or no). **Use this when you want to stay on topic**

inurl:

Monitor the Web for interesting new content

Google Alerts are email updates of the latest relevant Google results (web, news, etc.) based on your choice of query or topic.

Enter the topic you wish to monitor, then click preview to see the type of results you'll receive. Some handy uses of Google Alerts include:

- monitoring a developing news story
- keeping current on a competitor or industry
- getting the latest on a celebrity or event
- keeping tabs on your favorite sports teams

You can also [sign in to manage your alerts](#)

#22: Tools: Search web history

- www.google.com/history

The screenshot shows the Google Web History interface. At the top, there's a search bar for "Search Web History". Below it, the "Web History" section is visible, with a lock icon and the text "Only you can see your history".

On the left, there's a sidebar with categories: All History, Web, Images, News, Shopping, Ads, Videos, Maps, Blogs, Books, Visual Search, Travel, Finance, and Bookmarks.

The main content area features three charts:

- Hourly search activity:** A bar chart showing search activity over a 24-hour period. The x-axis is labeled "AM" and "PM" with markers at 12, 2, 4, 6, 8, 10. The y-axis represents the number of searches.
- Daily search activity:** A bar chart showing search activity for each day of the week (Sun, Mon, Tue, Wed, Thu, Fri, Sat).
- Web Activity:** A calendar view for March 2014. The total number of Google searches is 53674. The calendar shows search activity for various days, with a total of 41+ searches for the month.

Below the charts, there's a "Show more trends >>" link. Underneath, there's a "Remove items" button and an "Older >" button.

The "Today" section lists search history items:

Singaporeans Fret Over 3rd Flash Flood in 30 Days

Singapore's parliament opened hearings today on a series of damaging flash floods which have swept the city in the past month, most recently this weekend. Singapore's environment minister [blamed a prevailing "La Nina" wet weather pattern](#) and Typhoon Conson, but said [global climate change](#) may also play a part.

How the TSA Went 'Viral' on YouTube

By Kevin Allocca 12:06 PM | Dec 3, 2010 | Categories: **Newsroom**

The Transportation and Security Administration has been a hot topic in the past month, and today our top trending video is footage captured at an Oklahoma City airport of wheel-chair bound Tammy Barvick, who stopped to her underwear to avoid a search. That clip, which you can view [directly here](#), has been viewed over a million times in the past day.

10. Traditionally, a **font** was one size of one typestyle. Today a **font** refers to all sizes of one style of type.

11. Combine all the fonts of all the typestyles available, and you have the family of type.

Fonts
Traditionally, a **font** was one size of one type style in a particular typeface (10). Garamond roman was one **font**, and Garamond italic another. A **font** consisted of all the characters required to set type in a single size; uppercase and lowercase letters, punctuation marks, numerals, and special reference marks. A familiar example of a **font** is the keyboard of a typewriter. If you were to strike every key a single time, you would produce a **font**.

Today the term **font** is used more loosely. A **font** still refers to a specific typeface and type-style but no longer refers to a particular type size. This is because digital typesetters generate type in any number of sizes.

Fonts may vary in both the number and variety of characters they contain. In addition to the alphabet and punctuation marks, some fonts are drawn to include special characters, such as small caps, ligatures, old style figures, mathematical symbols, and diacritical marks.

Type Families
If we combine all the fonts of all the typestyles of a given typeface (roman, italic, bold, condensed, etc.) we have a family of type (11). By selecting fonts within the same family, a designer maintains typographic consistency. Since all typestyles within a family share common characteristics, such as design, x-height, cap height, and length of ascenders and descenders, they will appear harmonious when combined.

Most type families are relatively small, containing roman, italic, and bold typestyles. Some families—Helvetica, for example—are exceptionally large, with variations ranging from thin condensed to bold extended, plus unique display faces such as outline and drop shadow. For a few of the many Helvetica variations, see page 15 and 156.

Flight numbers (to track a flight): [**AA 102**]

Question is...

- What's indexed?
- Is all of Google's content indexed on the Google Search Engine? ?
Universal search means... what... to the average user?
- How does a searcher know what's available, or even possible?
- Example:
 - Find an online readable copy of Popular Science magazine, Nov 1955?
 - Find a telephone directory from Rochester, NY 1920?
 - Find a list of all the universities with an office in Washington, DC?

Summary

- **When in doubt, search it out!**
- **Your search skills will become stale quickly...**
.... keep tracking the new features that we offer!
- **Practice deliberately.** When you get the chance, try the same search a few different ways and note the differences. Ask why!

Announcement: MOOCS
